

TOPG April Program Meeting

Night Photography - Mike Macartney

Are you looking for something to get you out of the house to take photographs?

Is your camera lonely that you never get dressed up and take it out for a night on the town anymore?

Did you last use your tripod in 1993? Do you remember how to focus a lens, set an f-stop, use those iso 10,000 settings on your good camera?

Are you bored of trying to photograph yet another California Poppy in the noonday sun, another bazaar in Istanbul, another Spiderman in front of the Chinese Theater?

Night photography may be for you.

You probably have forgotten about reciprocity failure, thankfully, and all the rest. There's a new group of young and old people out there doing night photography, with film even. Find out what it's about.

**6:00 PM, April 18, 2019
at the Goebel Center**
